

Venice, June 7 2016

PRESS RELEASE (kindly to be spread)

A national collaboration to promote inventors was born in Venice

Agreement signed between Andi Association and International Inventors Exhibition 2016

Andi (Associazione nazionale degli inventori) becomes an official partner of the International Inventors Exhibition 2016, the global event dedicated to inventors from all around the world, held in Venice from October 13 to 16, 2016.

The agreement has been signed these days, and provides for the promotion of the meeting between the members of the Italian organization, and at the organizations of other Countries related to it, as well as for the development of the “Inventeco” project in a special section inside PalaExpo Venice, where the project will be hosted.

“We are delighted to have reached this agreement with the main Italian association engaged in the innovation field, that values the intuitions of many people, supporting the added value of intellectual labor - explains Gianfranco Gramola, director of IIE2016 – Our hope is that, with the event of Venice, invented city by definition, as originally built on water, a long-term partnership can start the promotion, from a reality in profound transformation such as Porto Marghera, of the revival of the territory, relying on ideas, their growth and their development”.

“Andi supports the International Inventors Exhibition of Venice because it is exactly in line with the aims of our Association, that has always pursued the promotion of innovations and the protection of inventors - highlights vice president Andrea Fabi – Our intent is to give maximum support to the initiative, which represents an extraordinary showcase for the commitment of those who wish to offer their insight for the progress of the Country and people. Moreover, it is an important opportunity to put into circulation ideas, compare opinions, exchange experiences, try new solutions together”.

Andi is made up of professionals skilled in providing assistance in the field of patents, helping inventors in filing their patents. It currently has 2,000 members. “Genius is the man capable of saying profound things in a simple way”, the slogan that sums up the association’s mission, which is well reflected on the Venetian event.

After the formal launch of the appointment, which took place in the past weeks in Rome and Milan, the recordings of the participants at the International Inventors Exhibition are already underway, which will involve hundreds of inventors from around the world, with the aim to meet and present itself to the general public, estimated in 40 thousand visitors during the four days.
